

High Availability P&C Solutions

Tritech's "Virtual P&C Insurance Solution Centre" provides a complete Internet-based P&C solution. This outsourced solution is flexible and easily managed by your business analysts. Tritech's General Insurance Management System (GIMS) is an Enterprise End-to End solution that fully automates your workflow and supports all lines of business in Canada and the United States.

The Outsourcing solution is based on the latest Intel multi-core fault tolerant platforms with automatic failover configurations to provide non stop operations. The world class Data Centre provides 24 x 7 operations. Secure and redundant accesses are provided to your users keeping the system available at all times.

Key GIMS Features

- Agent and Client self-service portals
- Policy underwriting
- Billing and collections
- Claims management
- Reinsurance management
- Automated workflow diaries
- Document issuance (incl. checks)
- Rules engine
- Legal archive
- Management reporting
- Financial reporting
- Bureau filing (IBC, NAIC, ISO)

Policy Types Supported

- Commercial Auto
- Specialty lines (CPP & BOP)
- Commercial Property & Liability
- Workers Compensation
- Personal Auto
- Non-Standard Auto
- Personal Property & Liability
- Farm & Country Estate

The Outsourcing solution runs at Fusepoint's five 9's World Class Co-location facility with a Hot Site backup at Tritech's Data Centre. This provides a superior level of service, with fully equipped facilities to keep our clients running in all situations. We back up our Outsourcing services with a 99.5% up time guarantee.

Tritech's P&C Solutions are continually viewed as best of breed, as evidenced by Celent's 2005 review of Personal and Commercial Lines P&C Solutions: <http://www.trifin.com/pdf/celent2005.pdf>
